I'm not sure if I'm doing this right. I've got a brand new genuine Weber 32/36 dgev. I was told the float level does not come set so I checked and it was way off from the info I could find. I adjusted the float drop to 51mm, no problem. Then it sounds like I'm supposed to hold the Carb top vertical and let the float rest on the needle valve without compressing it. I set that to 35mm ...
