Can someone explain to me what this port is and why it somehow automatically gets assigned to my network printers? I periodically have printer issues from my print server with certain

printers...when i look into the issue I find that the printer has a WSD port assigned to it.

What a WSD port is and why it gets assigned to your printers

In both cases we can see that the most common times were 3, 4, 5, and 6 minutes, although there are also several times of 7, 8, and 9 minutes. There were no times of 1, 2, or 10 minutes. To find the mean, we need to add up all of the times and divide by the number of data points, 20.
