1/2 VW Engine Kits, Parts & Plans from Great Plains Aircraft!

This is a 1/2 VW engine. That's right, they cut the engine in half, cutting out the back cylinders and welded the case back together so only two cylinders exist. The purpose of such an engine is for ultralight or very very light aircraft, without spending twice as much money on expensive Austrian two-stroke power. "But, why?" you may ask.

Let's go fly on half of a VW engine. - Oppositelock

The Hummel VW conversion makes a dandy four-stroke engine on Part 103 ultralights like the Ultracruiser. This South African AeroTrike was flown around Mexico for 2000 miles by owner Rob Rollison. The Rotax 912 is now widely used on higher-end trike models like this one from Cosmos of France.

Given the cost of a new VW engine case, that is just going to be cut up adding further to the cost, what we need is a modern version of the

Global/Mosler case. Such an engine would be a nice fit between the O-100 and the 1L industrial engines.
